

Leading the way in Integrated Enforcement Services

Tanfeeth+ introduces a new benchmark of innovation and efficiency for essential judicial services in Dubai, delivering a seamless, transparent and integrated ecosystem benefiting all stakeholders.

WHO WE ARE

We are committed to a dependable, secure and modern judiciary system

Tanfeeth+ underscores Dubai's commitment to efficiency, transparency, and adherence to legal standard. Tanfeeth+ stands as a symbol of a dependable, secure, and modern judiciary and marks a new era of accessible and effective legal practices.

OUR PILLARS

Delivering impact for all stakeholders

Operating across five key impact pillars, Tanfeeth+ facilitates an efficient, agile, transparent, collaborative, and equitable judiciary through digital transformation. Tanfeeth+ is set to launch a new era of accessible and effective legal practices within the Dubai Courts system

Transparency & Information Sharing

Enabling seamless and secure data sharing..

Collaboration with Partners

Enhancing collaboration with partners to provide integrated enforcement services.

Legal Compliance

Ensuring compliance for a fair and trusted judiciary.

STRATEGIC PROJECTS & INITIATIVES

Integrated digital enforcement

Tanfeeth+ is setting a groundbreaking standard for digital integration and efficiency in providing judgment enforcement services. Through Tanfeeth+, Dubai Courts assists the customer in procedures related to the enforcement of judgments by establishing a seamless, transparent, and integrated ecosystem that benefits all parties.

Digital Writ of Execution Seal

Facilitating the enforcement of court rulings through a Digital Writ of Execution Seal, enabling the petitioner to initiate procedures without the need to visit service centers.

Disclosure Platform

A digital platform integrated with various entities, allowing the enforcement judge to directly inquire about the respondent's assets and seize them for sale if necessary to settle owed amounts.

Integration with MOI

Ensuring the enforcement of liberty- restricting orders, travel bans, and asset seizures by integrating with the Ministry of Interior's program, where the judge's order is directly reflected in the Ministry's system.

Digital Requests

Optimising Work of Execution procedures based on procedural sequences and automatically issuing decisions on administrative requests then assigning them to specialists for execution.

Sale Notification System

Notifying officials in charge of the execution of a judgement about items confiscated as part of a ruling so that they can be sold within a specified time frame.

Automatic Cancellation of Enforcement

For cancelling enforcement procedures and lifting seizures once payment is completed in the enforcement file, then notifying relevant parties to cancel related procedures.

Virtual Bank Accounts

Accounts for each party in the enforcement file created upon registration, enabling entities holding the seized assets to deposit funds directly into these accounts for automatic disbursement to each party.

Automated Disbursing System

A system that automatically disburses amounts deposited in the enforcement file to the petitioner's registered bank account after verifying there are no legal impediments.
